

A2 “run for life” User manual

by Mui,Dixon iD : 3677188

Story : You went to a haunted house for adventure but you awaken the ghost , now the ghost is chasing you and you have to run for your life to prevent the death of yourself.

Win lose condition : To win the game, the player must reach the goal meter, when the player successfully reached there , a door will appear , reach there and you escape the haunted house.

If the player is unfortunate, hits some bombs and has no HP left, the player will die and lose the game. The player also needs to keep running to escape the chasing of the ghost. If the player stops running and hits the left side ,the player loses.

the HP bar:

the goal:

the ghost (try to run away from it):

Control: use wasd for different directions of the players. There is some slight difference from the traditional wasd control . D is forward , S is right , W is left and A is backward. If player forgot how to control , the player can visit the guide.

Buttons: There are some button for players. Below will show what each button will do.

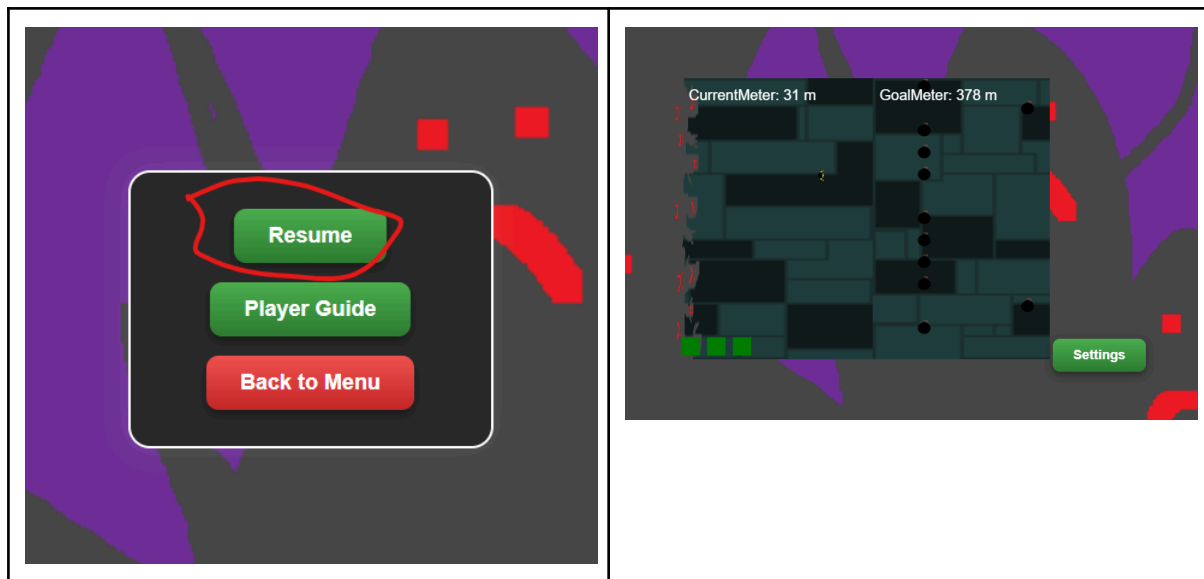

Play Game button will start the game.

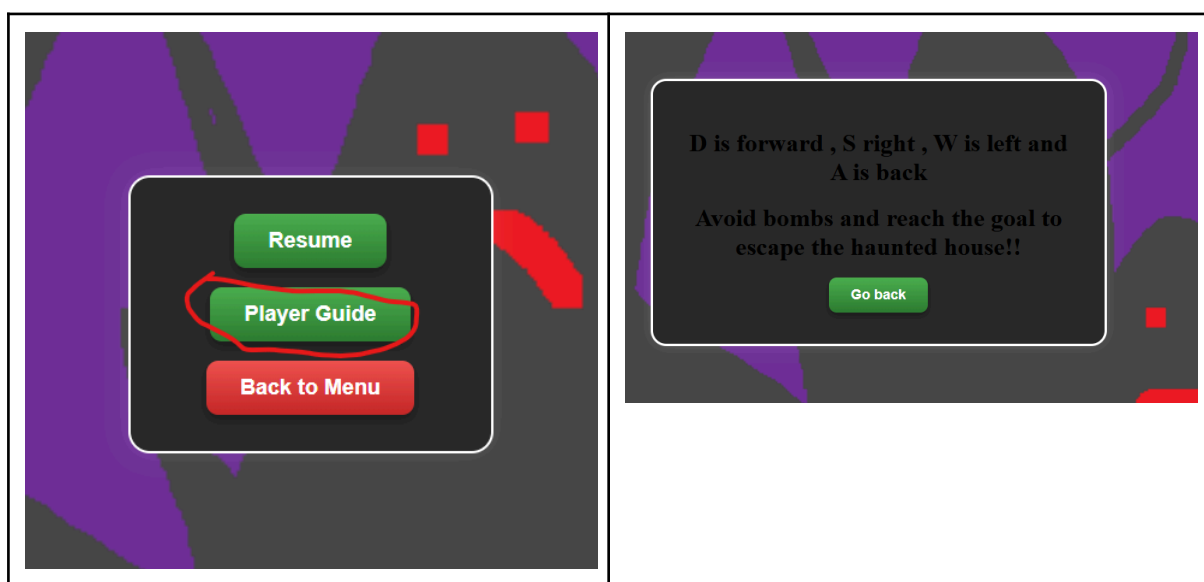

Setting button will open setting menu:

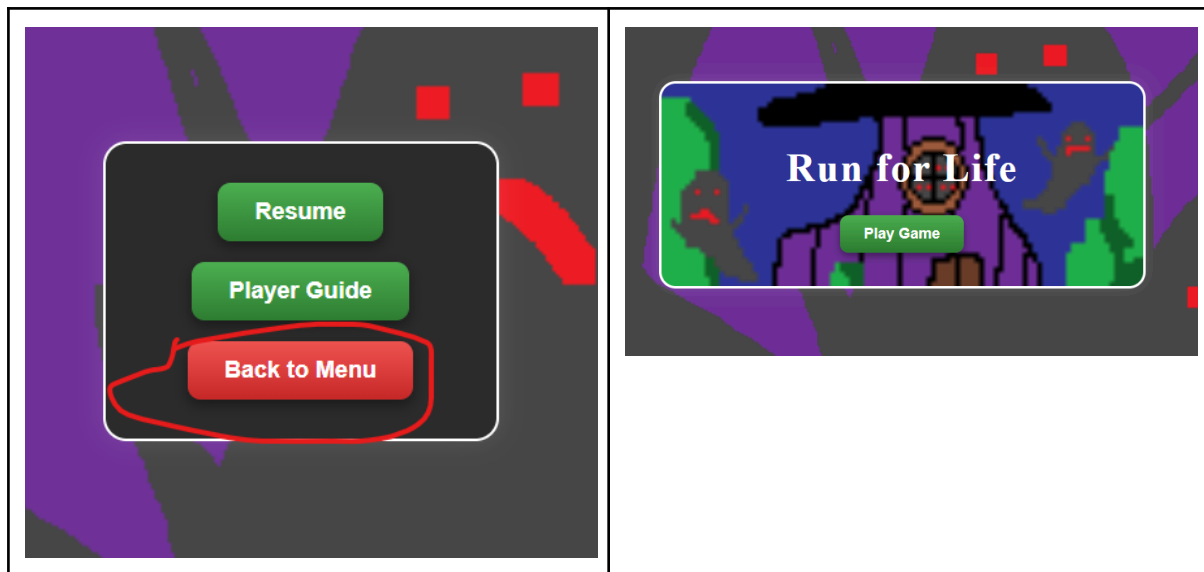

Resume button will go back to game screen:

player Guide button will show how players can control and play the game:

Back to Menu button will go back to main screen.

No matter win or lost, the back to menu button will bring the player to the main screen :
